System specifications:

Manufacturer:	MAKO
Model:	KA11
Serial #:	540623
Purchase Date:	6/19/1986
Last hydrostatic test:	1/2008
Last service date:	9/9/2010
Last air quality check:	Unknown
Current hours:	359

Details: Fixed installation; 3 high capacity bottle system with compressor. Available until donated. Receiving fire department will be responsible for disassembly, removal and transporting back to their location. Unknown total weight of the entire system, however it's very heavy.

Defects: System was in use through early 2011 and functioning properly. System was removed from service in mid-2011; needs complete service and air quality check.

Warranty: Complete system will be donated "AS IS"; no implied, expressed or written warranty. Donation must comply with RSMo 320.091.
