

# This is gonna be big!

## BIG speakers!

DENNIS LeGEAR AND TONY CARROLL PRESENT

Study of the

## IMPACT OF FIRE ATTACK

Dennis and Tony will discuss lessons learned from various UL FSRI studies, including “Study of the Impact of Fire Attack Utilizing Interior and Exterior Streams on Firefighter Safety and Occupant Survival,” and the “Coordinated Fire Attack.”

These two firefighters served as technical panel members and were keenly involved in the UL studies. Hear their unique insight and expertise into the studies’ findings, something not found by reading the studies alone.

Attend this no-nonsense, one-day class to learn what they’ve learned—and how you can apply it in your department.

**Date/Time:** Wednesday, November 9,  
8 a.m.-5 p.m.  
**Location:** Ottawa Memorial Auditorium  
Ottawa, Kansas

**Price:** \$60/person (all taxes and  
fees included). Pricing  
increases Sept. 1, 2022.  
**Hotel:** Check the event website  
for hotel block info.

## BIG topics!

- ★ General concepts of water mapping with interior and exterior (transitional) fire stream attack components
- ★ The details, pros and cons of solid, straight and fog streams
- ★ Air entrainment and the relationship between fire attack and search, as well as the importance of door control
- ★ Targeted search with VEIS in relation to both interior/exterior stream fire suppression as well as the benefits of this tactic
- ★ Vent times and types (access, life, fire) as it relates to coordination with suppression
- ★ The driving factors causing civilian death based on full-scale burns
